ON THE SELF AND ETHICS IN MUSICAL IMPROVISATION

WHAT CAN WE LEARN?

INTRODUCTION
ANXIETY ABOUT THE VALIDITY OF IMPROVISATION

Improvisation is still the rebel (?)

... It should be the norm, not the fringe alternative...

structurally enforced
CRITIQUE

The discussion has a tendency to exclude many non-western types of improvised music

- Frisk & Östersjö (2013)

Improvisation as a stylistic delimiter is problematic

METHOD

The practice of improvisation as a method with which different values may be proposed
ETHICS

The practice of improvisation reveals a certain possibility for ethics

Focus is on *what happens*, not *how to make it happen*
PLAY

Play, or free-play, is the activity that is not bound to a particular concept.
KNOWLEDGE

Whether musical practices can give rise to knowledge outside of its own field

• it is not the art object as knowledge (though it could be), it is the *doing* of art
METHOD

Control or giving up the control?

*When improvising, am I creating material when I play or do I find it?*

FOUCAULT: PRACTICES OF FREEDOM

In this method a particular development between self and others is at the core

Inspired by Foucault's notion of the *care of the self*, a self that is rooted in "practices of freedom"
Freedom is the ontological condition of ethics. But ethics is the considered form that freedom takes when it is informed by reflection.

SUMMARY

As long as I care about the relation between myself and the other, and the larger context, I can be free to follow my artistic and ethically informed intentions, which will enforce my freedom.
THE CARE OF THE SELF AS PRACTICE

The care of the self is not a solipsitic activity
When you take care of the body you do not take care of the self. The self is not clothing, tools, or possessions; It is to be found in the principle that uses these tools, a principle not of the body of the soul.
You have to worry about your soul—that is the principal activity for caring for yourself. The care of the self is the care of the activity and not the care of the soul-as-substance.
FOUCAULT

You have to worry about your improvisation – that is the principal activity for caring for yourself. The care of the self is the care of the activity and not the care of the improvisation-as-substance.

The principle that uses the tools of artistic practice is in essence the aesthetics of the creative act: the practice itself.

• a developed sense of ethics comes from a deep understanding for the relations I'm engaged in
• maybe paves the way for a artistic knowledge claim
  ▪ through these *connections* knowledge may be developed
ETHICS: MOTIVATION
MORAL QUESTIONS
MORAL QUESTIONS

• the power relations between the arts and the control structures of capitalism are, in an understatement, unequal

• the power relations between the arts and the control structures of capitalism are, in an understatement, unequal

• the possibility for interpretations of moral questions is shrinking.
MORAL QUESTIONS

- the power relations between the arts and the control structures of capitalism are, in an understatement, unequal.
- the possibility for interpretations of moral questions is shrinking.
- the panoptic control structures of social-media become second nature and they offer an understanding of ethics that is both normative and irrational.
MUSIC

Both music and ethics lack clear definitions - yet, they are incredibly important.

Ethics in artistic practice, that is, the moral values that are expressed through artistic practices in music, may complement traditional views on ethics.

DEFINITION

this free play of associations is perhaps best described by Susanne Langer (2009) as a *uncritical fusion of impressions, that exercise the powers of symbolic transformation*
FRAMEWORK
FRAMEWORK

• judgments such as right and wrong are useless to employ in music
FRAMEWORK

- judgments such as right and wrong are useless to employ in music
- they are equally difficult to determine in ethics

- in both cases there is a need for a framework through which the judgements may be applied
- Artistic practice, developed through the care of the self, is proposed as such a framework
THE INTERACTIONS ARE THE PRIMARY INTEREST

It is the interactions that are made possible by engaging in an artistically driven play with the objects:

• a free play with no particular meaning

In this free play I can engage with certain questions in a way that would otherwise not have been possible. Improvisation is part of the method that allows me to do this.

CENTRAL QUESTION

how thinking about improvisation in this way may allow me to understand the ways I may approach the other in and through this practice

I will attempt to devise a method with which I can understand and explore these processes from the inside of my own practice, well aware of the potential limitations in scope that this will carry.
IMPROVISATION AS METHOD

improvisation is a method with which musical and human relations can be explored and with which new music can be found and created.
KNOWLEDGE CLAIM

The knowledge lies in the connections between the various agents involved in the practice
